Cute and Quick Cutter Quilt Trees

Copyright 2020 BadAss Quilters Society www.badassquilterssociety.com

Gather some craft dowels, spools and some pinking shears and you are ready to make the cutest forest ever! Using either the quilt patterning or the included triagle template layer two pieces of cutter quilt and stitch together **WRONG SIDES FACING**. Leave a small opening at the center bottom to thread in the dowel rod. "Pink" around all sides to give more dimension. Trim dowels to varying heights for as big of a forest as you want! (odd numbers work best). Glue rods into spools and thread spools into trees. (Think about staining spools and dowels ahead of time as well!) Embellish your little trees with vintage buttons and twine for even more fun.
