Cutter Quilt Pumpkin

Copyright 2020 BadAss Quilters Society www.badassquilterssociety.com

Start with cutting something vaguely like a circle this one was 30 inches. Using a STRONG thread or even dental floss run a gathering stitch along the edge and cinch up part way but do not secure yet! Scavage an old throw pillow and gut it for the stuffing.. stuff fully and then cinch shut and tie tightly to close. Using a heavy twine and a strong button wrap around the pumpkin bisecting, tucking and fluffing sections to "mold" into the shape of a pumpkin. To top, take a quick walk into the back yard and look for a dry branch and some vine and a bit of dried moss (or hit up the craft store) and hot glue to the top.. it is that easy! Now, make another one, the more you make the more impressive your display will be!
